

Making Hyperverge an Approved Partner in Digilocker

After obtaining partner credentials from Digilocker, the next step is to designate Hyperverge as the authorized partner on the client's Digilocker account.

Steps to add Hyperverge as the authorised partner is as following:

1. Once the partner account is created log in [here](#) to add Hyperverge as an Authorised partner.
2. In the Consume API section, click on digilocker section
3. Click on **Meripehchaan(Authorised partners)** on the left side and click on **Generate new key** to add a new partner
4. A form will be opened, add the required details and click on submit. (Please do note that Client ID and Client Credentials will only be shown post all the details and filled and submitted.)
5. Add the Client domain page URL in the website URL section.
6. Add the client name/ the name that should be visible in the consent screen in the **Descriptive App Name** section.
7. Add the following URL as a **Call Back URL (Redirect URL)**:
<https://digilocker.hyperverge.co/index.html>
8. Add "web" as the **App type** and select the first checkbox in the scope section (i.e for Issued Documents), then Click on submit.
9. Client ID can be taken from the above list. To obtain clientSecret select the clientId created and click on the edit option shown on the right side.
10. The clientId and clientSecret shown on the screen should be shared with Hyperverge.
